Evergreen

Joint Journal of Novel Carbon Resource Sciences & Green Asia Strategy

Volume 02, Issue 01, March 2015

CONTENTS

Seung Kyum Kim, Reiji Hattori Study of Contact Resistance on Organic Thin-Film Transistor with Surface Treatments	1
Abdul Halim Abdullah, Mitsugu Todo Effects of Total Hip Arthroplasty on Stress Adaptation and Bone Remodeling in Lower Limbs	6
Syed Muztuza Ali, Anutosh Chakraborty Performance Study of Adsorption Cooling Cycle for Automotive Air-conditioning	12
Kana Moroga, Toshiyuki Fujita Effect of Investment Regulations and Subsidies on the Proliferation of Next Generation Vehicles in China	23
Fauziah Jerai, Takahiko Miyazaki, Bidyut Baran Saha, Shigeru Koyama (Review Article) Overview of Adsorption Cooling System based on Activated Carbon - Alcohol Pair	30
Takashi Watanabe Ignorance as a Limitation for the Application of Scientific Methods to Environmental Protection Activities	41
Munim Kumar Barai, Bidyut Baran Saha Energy Security and Sustainability in Japan	49
Tomoaki Watanabe (Book Review) Green, Jessica F., <i>Rethinking Private Authority: Agents and Entrepreneurs in Global Environmental Governance.</i>	57

Editorial

On behalf of the Editorial Board members of the Evergreen - Joint Journal of Novel Carbon Resource Sciences & Green Asia Strategy and the field editors, Prof. Hideo Nagashima and Prof. Seigi Mizuno, along with editorial members Prof. Kazuhide Ito and Prof. Naoko Okibe, I am privileged and delighted to announce the publication of the third issue of the Evergreen Journal.

The committee has decided that the journal should be published as both an open-access online journal and a printed version. Evergreen is a refereed international open access online journal, serving researchers in academic institutions and research organizations and all practitioners in science and technology to contribute to the realization of Green Asia where ecology and economic growth intertwined. It was also decided that we would endeavor to publish two issues a year in March and September. The journal is jointly-sponsored by the Leading Graduate School of Global Strategy for Green Asia, Research and Education Center of Carbon Resources, and Research and Education Center for Advanced Energy Materials, Devices, and Systems in Kyushu University, Japan.

The first two issues in 2014 owe much to the contributions of many people. Thanks are due first to the Editorial Board members, who originated the idea and supported it wholeheartedly.

This issue consists of 7 contributed papers and one book review. All the 7 contributed papers and book review were selected after peer review by at least two experts for each submission in accordance with the peer review policy of Evergreen - Joint Journal of Novel Carbon Resource Sciences & Green Asia Strategy.

There is a wide spectrum of topics on (i) organic thin-film transistor with surface treatments, (ii) bio engineering (iii) thermally powered adsorption cooling cycle, (iv) regulations and subsidies on the proliferation of new generation vehicles in China, (v) activated carbon-alcohol based adsorption chiller, (vi) scientific methods to environmental protection activities, (vii) energy security and sustainability in Japan, and (viii) a book review on Rethinking Private Authority: Agents and Entrepreneurs in Global Environmental Governance by Jessica Green in this third issue of Evergreen.

We wish to place on record the services of the reviewers for their constructive comments and criticisms which contributed immensely to improve the quality of all the papers chosen for this issue.

Bidyut B. Saha

Editor-in-Chief

Evergreen - Joint Journal of Novel Carbon Resource Sciences & Green Asia Strategy

Bidyut Baran Saha, Ph.D., Professor

Kyushu University Program for Leading Graduate School, Green Asia Education Center,

Interdisciplinary Graduate School of Engineering Sciences,

Kyushu University, Kasuga-koen 6-1, Kasuga-shi Fukuoka 816-8580, Japan

and, International Institute for Carbon-Neutral Energy Research (WPI-I2CNER)
