

### Green Asia Field Trip to Indonesia

Takashi Watanabe

Green Asia Assistant Professor, Green Asia Education Center

**Date:** September 11-18, 2017

**Destination:** Severas Maret University, Surakarta, Indonesia

**Number of people:**

13 students including 2 from Prof. Miyazaki's lab., 3 Staff.

**Purpose:**

The main purpose of the tour was to:

1. provide a novel opportunity for students to give a presentation in an international conference and to increase their knowledge of modern Indonesian industries.
2. provide new students with an opportunity to become more intimately acquainted with their peers.
3. give some insight into the culture, history and working practices in Indonesia.

	12:30PM - 01:15PM	Lunch	
	01:15PM - 02:00PM	Going to Adi Sumarmo international Airport	

**Assignments:**

We gave several assignments to the GA students such as:

1. Each student was required to acquire some basic knowledge of the target destinations.
2. The report should be submitted to the GA office by email no later than 7days after the conclusion of the excursion. The report should be typed, 12pt Times New Roman on an A4 sheet in the PDF format.

**Conclusion:**

Throughout the tour, all students had a positive attitude towards all the events, including the report assignments. As the most remarkable example, we could see that the students who were designated as leader and sub-leader were excellent for taking care of the group members.

The tour contained various events starting from the tour to Keris museum and the ICIMECE conference on the second day, to 5 exceptional and educational workshops throughout the following days. All events were orderly planned and managed by Severas Maret University. The tour, therefore, was fruitful with multiple occasions to learn not only technological knowledge to which each student dedicates in their laboratory but also the knowledge of Indonesian society and culture.
